Jens Korsgaard

Sound Designer

Phone: +45 28 72 93 92 Mail: jensbkorsgaard@gmail.com Region: Aarhus, Denmark

Competencies

Sound Production: Ableton Live 11, Pro Tools, QLab and Logic Pro

Experienced in: Theatre, Music, Mix and Mastering, Podcast, Movies (inc. Dolby Atmos), games and installation art.
Gear: Fender Jaguar Bass, Fender Stratocaster, Effects (Strymon, TC Electronics, Boss and MXR), Yamaha DX7s, Juno-106, Korg Z1.
Skills: Guitar, bass, drums, piano/synth, vocal, mixing and mastering.
Soft Skills: Creative thinking, cooperation and project management.

Education

Secondary Education
Munkensdam Gymnasium (Mat A, Social studies B, Biology C)
Year of graduation: 2019.

Higher Education
Bachelor's programme in sound design at Sonic College 2024-2028.

Who am I?

I am a Sound Design student at Sonic College with a strong musical background since childhood. I take an experimental approach to sound, working at the intersection of music, sound design, and audio storytelling, with a keen interest in creating original sonic universes that convey atmosphere and support a narrative. Through these projects, I have developed a practice where creative concept development is combined with an eye for detail and a deep understanding of the artistic and technical possibilities of sound. I am motivated to explore new sonic expressions and translate ideas into well-crafted audio experiences.

Daily life

I play in a band and simultaneously work with music production for other artists, focusing on production, mixing, and mastering. In January 2027, I will be responsible for the entire sound design for a production in the Main Hall (Store Sal) at Teatret Svalegangen. From March to May 2027, I will be doing an internship at Aarhus Teater, where I will be learning the theatre's technical setup and sound systems. Alongside my own musical projects, I continuously work on developing my skills within sound production and sound design.

Projects

I have worked on a variety of projects within film, music, podcasts, and installations. For the animated film Godkiller, I was responsible for the majority of the sound production in Dolby Atmos 7.1.2, working with Foley, SFX, music, and mixing. Additionally, I have produced sound for the film Black Hole, developed a podcast in collaboration with fellow students, and participated in an installation project at the HEART Museum in Herning, which was exhibited during the Socle du Monde Art Festival 2024. These projects have given me extensive experience in creating sonic universes across various media and artistic formats.
